

## Openrock Pro beige

Experience the wonderful feeling of open-ear headphones with the OpenRock Pro. This revolutionary product combines outstanding sound quality with unique design and wearing comfort for an exceptional listening experience.

Thanks to their waterproof design, the OpenRock Pro open-ear headphones are versatile headphones that are ideal for business, home office, sports or commuting. The open design allows you to still hear your surroundings so you can react to danger if necessary. And without your surroundings hearing your sound. An important contribution to safety!

The OpenRock Pro uses the latest patented TubeBass open-ear technology to give you an open and immersive sound experience. As the speakers "float" over your ear cups without touching them, you won't feel pressure in your ears or sweat because of the headphones

With the high-quality 16.2mm dynamic drivers, the OpenRock Pro delivers an impressive sound spectrum. From clear highs to powerful bass, you'll be able to hear every detail of your favorite music. The open design ensures a natural sound experience and excellent spatial perception.

The adjustable ear hooks ensure that the OpenRock Pro is comfortable to wear even when listening in a lying position and does not cause any pressure points. Thanks to the

4 built-in microphones and ENC noise suppression, crystal-clear phone calls and webcalls are always possible hands-free.

The enclosed charging box, which also serves as a protective box, allows convenient charging and you are ready for over 20 hours of music enjoyment. The charging box itself can be recharged via a USB-C cable. The OpenRock Pro combines stylish design, excellent sound quality and high wearing comfort. Experience your music in a new way without isolating yourself from important external sounds. This means you can hear the traffic or simply environmental noise even when you're biking or jogging and are safer on the road.
