

Plus MN2400/AAA/LR03 BP32

Duracell offers a wide range of reliable batteries that are particularly suitable for use in electronic devices with constant energy consumption. Duracell Plus AAA batteries are alkaline batteries that are ideal for powering your everyday electronic devices. Duracell Plus AA has up to 100% longer lifespan* (*for AAA size batteries compared to the average minimum lifespan in the 2015 IEC motorized toy test. Results may vary depending on device or usage behavior (IEC website)). Unused Duracell batteries remain fully operational for up to 10 years when stored at room temperature. These batteries are recommended by Duracell for regularly used devices such as motorized toys, flashlights, digital audio devices, etc. Along with the Apollo 11 mission in 1969, Duracell was the first-ever battery on the moon.
