

## Revo SuperCD walnuss silber

The widest variety of functions and compatibility possible in a single device: the REVO SuperCD is the one-box music system par excellence. Whether traditionalists or technical enthusiasts, the SuperCD convinces, like the other models of the REVO SuperSeries, with its timeless design, the best materials and exceptional manufacturing quality. With the SuperCD, we have the greatest possible access to tens of thousands of radio stations from here and abroad, we can play music CDs and MP3 CDs, access an almost unlimited repertoire of music titles through Spotify or listen to music from your own mobile phone via Bluetooth. Comfortable operation via a specially developed iOS and Android app is also possible. The included remote control completes the ease of use.

The SuperCD allows reception of various radio standards: DAB & DAB+, FM with RDS and Internet radio via WiFi. We thus have access to more than 36,000 different stations around the world.

The vertical CD player, the central element of the SuperCD, allows fans of "physical" music formats to take full advantage of them. The music system allows networking and playback of music files stored on computers or external servers. Bluetooth support allows wireless playback of music files from smartphones, Spotify Connect provides access to a virtual music library of over 30 million entries.

The REVO SuperCD is handcrafted with the finest materials and the most modern components. The real wood housing with aluminum and steel elements particularly highlights the high-end electronics installed inside. The OLED screen, combined with joystick control, brings a touch of modernity, while 2 BMR 3.5" speakers with a power of 40W ensure room-filling sound, combining deep bass with clear treble and pure, thus presenting the complete sonic image that is a trademark of the REVO SuperSeries.
