

Tivoli Model One Digital Gen.2

walnut/grey

A design-oriented smart radio that offers the latest music services and looks great doing it!

Sound

The Model One Digital takes our penchant for big sound in small spaces to a new level. The rear-opening design and Class A-B amplifier deliver powerful performance.

Connectivity

The device can be connected to your Wi-Fi network, giving you access to a wide range of services. You can also stream music to your device without a Wi-Fi connection via Bluetooth or Airplay. The FM and DAB+ tuner lets you enjoy a full range of radio stations, and you can also connect other audio sources to the device via the auxiliary input.

Operation

Play, pause, skip tracks or change stations with just a single dial, and set the source and volume with just a single button. For everything else, the Model One Digital comes with a full-featured remote control. When you stream app-based services over Wi-Fi, your phone serves as your remote control.

Future-proof

Automatic firmware updates via Wi-Fi ensure that your Model One Digital is always at the cutting edge of technology.
