

Tivoli Model One+ grey/white

Listen to DAB/DAB+ stations the way radio was meant to be, with the feel of an analog dial and the sound quality of our world-famous Model One radio. Enjoy the best that DAB+ has to offer at home!

Design

The design of the Model One+ fits effortlessly into the long history of Tivoli radios. Our signature handcrafted wooden enclosures house a rotary dial, two buttons, and a screen, putting only what you need right in front of you. Balancing the dial and screen was important, so we placed the speaker at the top of the radio to get both the look and sound we needed to proudly call it Model One.

Sound

A single top-firing speaker fills your room. The long-throw driver with heavy magnet is coupled with a frequency-adjusting circuit that automatically adjusts the output in half-octave increments. It is built into a wooden enclosure with vents, resulting in a musically accurate sound balance and natural sound reproduction.

Operation

In addition to the basic source, tuning, and volume controls, we've added easy-to-use presets that let you store up to 5 stations for each source. The radio comes with a full-

function remote that provides access to additional features such as an alarm clock and display settings.
