

Tivoli PAL+ BT white

This device is unfortunately sold out!

However, the successor will be launched in October 25 and we will put it on the webshop as soon as all the information is available.

Boldly designed to perform

The compact size of the PAL+ BT delivers high-quality sound and lasts for at least 16 hours on a single battery charge. The easy-to-use buttons, the easy-to-read LED screen and the front-facing speaker offer high functionality and a balanced appearance. The compact handheld design and weatherproof casing make the PAL+BT the ideal travel companion.

Sound

The small portable monaural speaker produces a full and dynamic sound. A high-magnetic-field driver is enclosed in an airtight housing to ensure impressive low-frequency reproduction. The amplifier adjusts the volume in half-octave steps, resulting in a balanced and precise sound. You can also use the equalizer settings to fine-tune the sound to your preferences.

Operation

Two control dials are all you need for power, playback source, volume, tuning and station storage. The remote control allows you to access even more menu settings and enjoy more from a distance.

Connectivity & playback

With the long battery life, you can play all your favorite content wherever and whenever you want via Bluetooth, FM or DAB+. For wired listening, the PAL+BT has an auxiliary input as well as a headphone output.
