HAND MADE IN IIIIANO ITALY.

DOMESTIC LINE

lapavoni.com

The real italian Espresso art since 1905

All over the world La Pavoni means "Espresso", a brand that for over a century has been recognized as the Italian excellence in the production of coffee machines.

Passion and tradition distinguish la Pavoni. Since 1905 espresso coffee machines, the company mission for more than 100 years of history identify la Pavoni in the world. Know-how, creativity and style, these are the qualities that spring from la Pavoni's Italian identity and characterise the company's commitment to bringing coffee machines to life.

HAND MADE IN WILANO ITALY.

LAPAVONI.COM

la Pavoni is a

historical Heritage

Aesthetic reasons aside, la Pavoni's identity is an expression of its actual Italian origins and the fact that the company is passionate about what it does. La Pavoni aims to identify and reflect the defining characteristics of Italian design such as inventive elegance originality and product quality. La Pavoni, over its history, has decided to focus on one main category, and to do it in the best way. La Pavoni coffee machines have never followed mass market criteria, but it has always guaranteed high-quality products, a quality acknowledged worldwide. The ability to produce highly competitive machines from a technological point of view has always gone hand in hand with a great care for their appearance, ever since the production of the earliest models.

LAPAVONI.COM

The secret of a real Italian Espresso Coffee

The lever machines allow a better exploitation of the coffee powders.

In this way we obtain "the cream of coffee" known as the true secret of the Espresso. Discover the step to obtain a perfect Espresso.

During pre-infusion phase you reach 0,8-1 bar pressure; then when you start pull the lever down, you should reach a pressure range among 6-9 bars* in the following 4-5 seconds;

After that, keep it almost stable for the following 10 seconds and then the pressure will decrease naturally till the end of extraction (after around 25 seconds).

The right temperature

Fill in the water and, turn on the machine with the lever down. The temperature light indicator will turn on. When it turns off the machine is ready to operate.

The hydraulic pre-infusion

By lifting the lever up, the water enters in the brewing chamber. It reaches the right temperature, dampening the coffee powder.

3

The right pressure

By lowering the lever down with the right intensity, you can obtain the right pressure profile to extract all the coffee aromas and brew an italian espresso.

■la Pavoni

Lever Espresso coffee machine

The range of lever machines are iconic models, made completely by hand in the company's Milan factory. They are an important part of Italy's design history, one which has made preparing coffee a delicious art.

The perfect combination of design, tradition and technology, the lever models offer perfect brewing which allows users to enjoy a delicious coffee with abundant "crema" from a miniature espresso bar-type machine. Indeed, manual brewing incorporates the art of preparing a real Espresso in the finest Italian tradition, for a coffee with an intense, fullbodied flavour.
