Absen Redefines the Standard for Meeting Room Display

▪ In today's meeting rooms, ambient light often plays a negative factor to ensuring that content, typically displayed with conventional projectors, is clearly seen by attendees; often times such ambient light causes the picture that is casted by a projector to become washed out, barely visible and illegible

▪ Welcome to Absenicon. This new LED display series takes the current meeting room experience to the next level by creating a bright, open and highly-productive meeting environment. Absenicon helps grab and maintain your attendees' attention while improving information delivery effectiveness and overall efficiency at each and every meeting

New Visual Impact

- Bringing content to life thanks to high levels of brightness, contrast ratio and color saturation
- With adjustable brightness levels from 0-350nits, Absenicon is able to offer clear images in 300lux office environments
- Outstanding grayscale performance, with brightness level even lower than 100nits
- No more projector shadows as well as noise interference, promising better meeting experience

Low Contrast Ratio

Shadows

Noise

4,000:1
High contrast
ratio

160° Ultra wide
viewing angle

Perfect View

- Enables every meeting member to receive complete presentation content and improve productivity to a brand new realm
- The contrast ratio exceeds 4,000:1 through ANSI 16-zone (4x4) checkerboard pattern. With enhanced colors and deeper black, the image is colorful and dazzling all the time whether in bright or dark room

Seven-in-one
Intelligent Control

Absen Developed Signal
Processing System

- Integrated design, higher integration, easy installation
- One-button switch machine, easy to operate
- PC, mobile phone and PAD wireless projection, not subject to "lines"
- Multi-user access, split screen display
- AI box+Wireless projection+Video processor+Power timing switch+Button control panel+One button switch+Multiple signal interface

* This product is only available in particular regions, please consult your sales representatives for more details.

Main Technical
Specifications

Product Name	iCon AI-Box
Model	AI-Box 2.0
Video Input Interface	WIFI 2.4 GHz or 5 GHz
	HDMI*2
	DVI*1
Bluetooth	BLE 4.0
Video Output Resolution	Support: 1920*1080、1536*864 1600*900、1440*810
Audio Output Interface	3.5mm
Other Interface	LAN *1
Extended Mode	Support
Function Button	Brightness、Volume、Standby、Input interface multi-channel selection / switch、Output interface multi-channel selection、Test Mode Adjustment etc.
Power/Consumption	Input power: 220V AC voltage Output power: 220V AC voltage 27W

Wireless Button

Connect and share
by just one click

Resolution Self-adaption

Full screen display with
auto-adjust of any resolution

Multi-screen Display

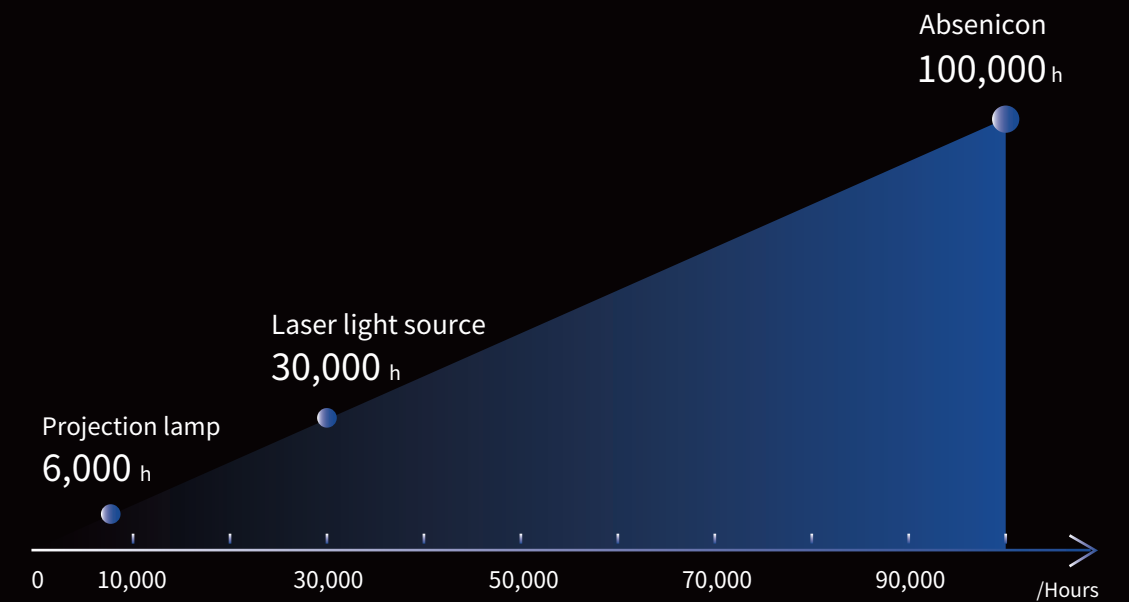

Support several signal sources
casted on one screen

Wireless Sharing

- Wireless Button
- Resolution Self-adaption
- Multi-screen Display

Solid Reliability

▪ Absenicon LEDs feature an ultra-long lifespan of 100,000 hours. Compared to a lamp projector which ranges from only 2,000-6,000 hours, and that of a laser light source which is less than 30,000 hours

Wall-mounting

Hanging

Wall-to-floor
mounting

Mobile stand

Full-screen Size and Modular Design

- Support multiple installations including wall-mounting/ hanging/ wall-to-floor mounting and mobile stand
- Quick installation. Two engineers are able to finish installation and ready it for use in four hours
- Easy maintenance and fast module service

Multiple Options

- Designed for meeting space of any size.(110/138/165/220 inches)
- Multiple versions, including E series economy version and C series 1080P full HD standard version, to meet diversified requirements

C Series Application Scenarios

Product features:

- Brightness 350nits, adjustable from 0-350nits
- Standard 16:9 aspect ratio
- 1080P resolution, FHD display (1920*1080)
- High fidelity point-to-point display of 1080P@60Hz signal
- Super low power consumption
- With panel thickness of less than 10cm and front maintenance advantage, this product in wall mounting installation is space-saving and helps save decoration costs
- Mobile APP supports control over the connection and disconnection system, brightness and color temperature adjustment etc.
- Standardized spare parts including frames and hangers etc.
- Modular design makes installation easier and transportation more convenient

Application Scenarios:

Ideal for today's high-end small, medium and large meeting rooms, conference rooms, auditoriums, classrooms, exhibition halls, etc.

Recommended size and capacity:

- C110: 20-40 seats
- C138: 30-50 seats
- C165: 60-100 seats
- C220: 100-300 seats

Medium conference room

C110 | 1920x1080 | 110 inches ▲

Medium conference room

C138 | 1920x1080 | 138 inches ▲

Auditoriums

C220 | 1920x1080 | 220 inches ▲

Large training room

C165 | 1920x1080 | 165 inches ▲

E Series Application Scenarios

Product features:

- Economy Version
- Brightness of 350nits, adjustable from 0-350nits
- Standard 16:9 aspect ratio
- Support the signal input of up to 1920*1080@60hz resolution
- Super low power consumption
- With panel thickness of less than 10cm and front maintenance advantage, this product in wall mounting installation is space-saving and helps save decoration costs
- Mobile APP supports control over the connection and disconnection system, brightness and color temperature adjustment etc.
- Standardized spare parts including frame, hanger etc.
- Modular design makes installation easier and transportation more convenient

Application Scenarios:

Standard small, medium and large meeting rooms, lecture halls, training rooms and classrooms, exhibition halls, etc.

Recommended size and capacity:

- E110: 20-40 seats
- E138: 30-50 seats
- E165: 60-100 seats

Medium training room

E110: 110 inches ▲

Large lecture halls

E165: 165 inches ▲

Large training room

E138: 138 inches ▲

Cases

C138 A university in London, UK

C138 A company showroom in Spain
