Visual Solutions

EQ1-IG Series SQ1-IG Series

Engaging Interactive Multi-Touch Displays for high efficient Team work

InGlass[™] - the ultimate in creative and collaborative presentations

- Ultra-precise pen writing accuracy and a no-lag touch
- One of the most natural writing experiences available, with paper-like touch and drawing feel on the anti-glare surface.
- Differentiates between finger, pen, and hand eraser.
- Interesting alternative to Infrared with more touch points, pinching, stronger resistance to ambient light, better image quality and durability.

High precision and reliability for collaboration

- 4k ultra HD resolution delivering the highest detail and image quality.
 The distance between the LCD panel and inner part of the glass is very small, resulting on an unmatched accuracy of touch with a tolerance below 1mm.
- 20 simultaneous touchpoints increases usability and participant involvement.
- The 3mm-thick premium glass is thick enough to withstand pressure
- of hands and palms leaning on screen, yet offers a very soft surface for writing.

Advanced features and extensive connectivity

• These multi-touch displays includes a wide range of flexible functions and extended connectivity from the main EQ1 and SQ1 series.

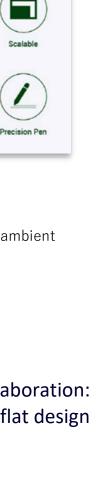

SQ1-IG 4K resolution, 500 cd/m², 24/7 operation, in large formats 86", 75", 65", 55". including an Intel[®] (Smart Display Module) SDM to easily integrate a slot-in computer. **EQ1-IG** 4K resolution, 350 cd/m², 16/7 or 24/7 operation, in large formats 86", 75", 65", 55". Comprehensive USB and video connectivity to connect devices to run collaboration software.

• Free Panasonic Whiteboard Software for Windows or Mac, including a whiteboard mode, PowerPoint presentation mode - as well as Video and Screen Capture functions.

• Panasonic recommends the Flatfrog Whiteboard application for the most precise writing experience

With the combination of better image quality, robust build – and resistance to ambient light – there are now fewer barriers than ever to true creative interaction.

Best touch features for collaboration: annotations, accuracy, immediacy, flat design
