		(Model No.: ET-EMS650) is used. Thevalue varies depending on the lens. *3 Around this time, light output will have decreased by approximately 50 %. IEC62087: 2008 Broadcast contents, NORMAL Mode, [DYNAMIC CONTRAST] set to [3], under conditions with 30 °C (86 °F), 700 m (2,297 ft) above sea level, and 0.15 mg/m3 ofparticulate matter. Estimated time until light output decreases to 50 % will vary depending on environment. *4 ET-EMT800 is compatible with PT-MZ17KL/MZ14KL/MZ11KL only. It cannot be used with PT-MZ20KL. *5 4K signals are converted to the projector's resolution (1920 x 1200 pixels) uponprojection. 4K/60p and 4K/50p signals input via DIGITAL LINK are supported in YPBPR 4:2:0 format only. *6 Measurement, measuring conditions, and method of notatio all comply with ISO/IEC 21118: 2020 international standards. On-mode power consumption measured at 25 °C (77 °F) operating temperature at an altitude of 700 m (2,297 ft). *7 Under conditions of 0.15 mg/m3 of particulate matter. Estimated maintenance time varies depending on environment. Filter can be washed and reused up to two times. *8 Average value. May differ depending on the actual unit. *9 Note that the projectorcannot be used at altitudes 2,700 m (8,858 ft) or higher above sea level.
