

# Professional Services Data Sheet

## SpinetiX ARYA - Batch Setup

For medium and large SpinetiX ARYA projects (10 players or more), the SpinetiX Professional Services team can help you save time which allows you to be ready the day of installation and avoid setting up your players one by one. This is all possible thanks to the SpinetiX ARYA Batch Setup service.

### Deliverables & Requirements

- ✔ The SpinetiX Professional Services team will set all your players up in your SpinetiX ARYA Enterprise cloud account at once. When you open your SpinetiX ARYA account, your players will be in the account with the correct settings including:
  - Player Name
  - Serial Number
  - Resolution
  - Screen Orientation
  - Time Zone
  - Audio Settings
  - Player Addresses (to properly setup Monitoring)
- ✔ Customer must fill out an excel file with the settings to be attributed.
- ✔ SpinetiX only performs the batch setup for the above-mentioned set of parameters.
- ✔ SpinetiX allows for one round of adjustment within 30 days after the initial service is complete in case needed.
- ✔ SpinetiX highly recommends that you have your installation plan prepared with the locations of your players with serial numbers predetermined and clearly communicated to the installer so that each player is installed in its intended location.
- ✔ Price is per batch setup performed. If you require several batches to complete your entire installation this service will be charged for each batch setup performed.

### Important information

- The SpinetiX Professional Services team must verify the serial numbers provided by the customer are for players that do belong to the customer.
